

ECAL | Activating your integration

Last Modified on 04/04/2024 2:17 pm AEDT

The ECAL and GameDay Events integration allows an organisation to create their own ECAL calendar widgets, select which Events they wish to publish on the Calendar, display the ECAL calendar on their website providing members or participants the ability to view and sync events from an organisations ECAL calendar. This integration also supports different types of ECAL widgets displays which can be used in different areas of an organisations website.

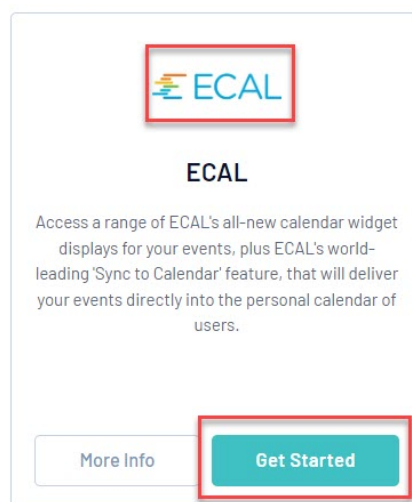

Before any of this can be done, your organisation needs to sync your GameDay Events database with ECAL via GameDay Marketplace. You can do this via the following steps:

1. Log into your organisation.
2. On the right hand side of the portal, click on the GameDay Marketplace icon.

3. Scroll down to PRODUCT INTEGRATIONS and click on **GET STARTED** within the ECAL option.

Product Integrations

4. Read information related to what ECAL will be going and read through the T&C's if

needed. Tick the I AGREE checkbox and click ACTIVATE.

GameDay Events x ECAL Integration

Getting Started

abc test ecal

By choosing to 'Activate' ECAL within GameDay Marketplace you agree to the [ECAL Terms & Conditions](#)

This will provide you a range of ECAL's all-new calendar widget displays for your events created in GameDay, including a page display, carousel and column widgets. Plus ECAL's world-leading, dynamic 'Sync to Calendar' feature, that will keep your audience up-to-date and connected with your events, delivered straight to the personal calendar of users.
