

## ECAL | Publishing an event calendar to your GameDay website

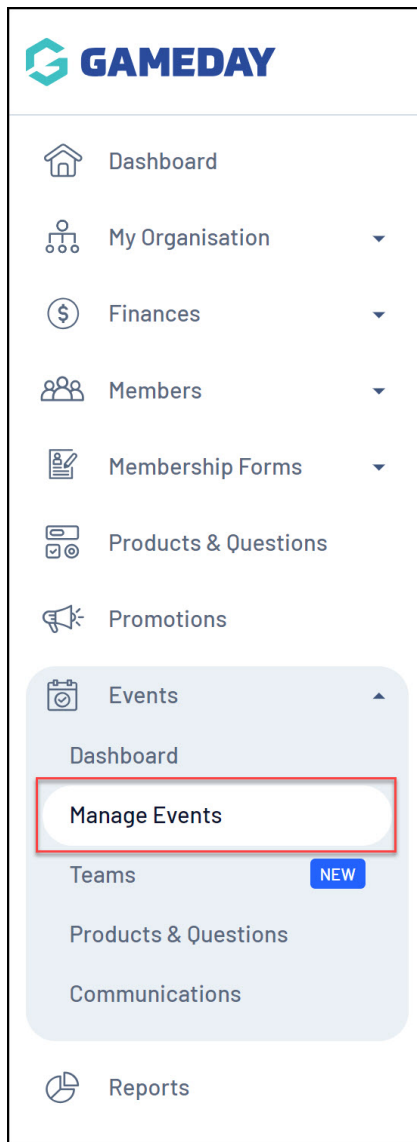

Last Modified on 04/04/2024 2:19 pm AEDT

**Note:** This process only applies to organisation that use GameDay Events AND have a GameDay Website

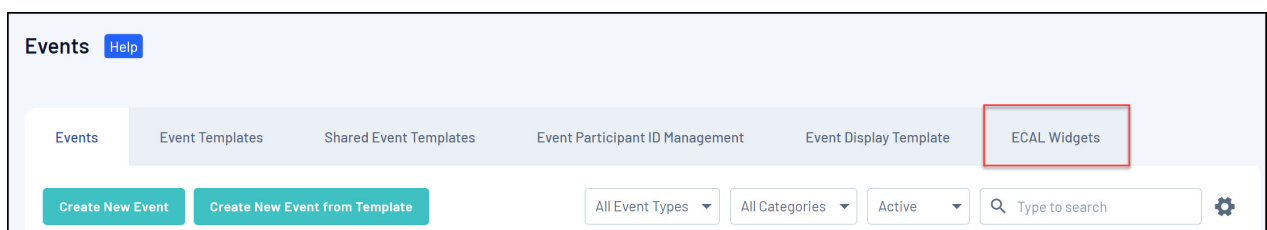

As a [GameDay Events](#) user who also has a [GameDay Website](#), you can use the integrated ECAL functionality available in your GameDay Events database to integrate a calendar widget into your website as a way of publishing your event schedule online.

To integrate ECAL into your GameDay Website:

1. Log into your GameDay database and click **Events** > **MANAGE EVENTS** in the left-hand menu

2. Click the **ECAL WIDGETS** tab

3. Click **VIEW** next to the relevant widget you wish to use

**Note:** GameDay Websites only allow a Carousel or Column event display

2. Then, Copy & Paste this HTML code wherever you would like the Event Display to appear on the website

```
<div class='ecal-sync-widget-event' data-ecal-apikey='CwTiUdx82vPZhAu0FSailq7Vvql0zQZlgLWVWmzMk6344cccd7' data-ecal-widget-id='6344cccd89f9f000e66654e' data-ecal-widget-type='carousel'></div>
```

Copy

**Note:** If you are using a third-party website, steps 1-4 will remain the same; however, when integrating into your external website, you will need to copy and paste the whole code from box 1 into the head of your website, and then copy and paste the whole code from box 2 into the page etc of where you want your events to display. For more information on this process, [click here](#).

5. Login to your GameDay Website and open the **SECTIONS** option

Website Setup

Your Website Features

help

Overview of your website feature settings.

Header

help

Manager your website header, navigation and colours.

Sections

help

These sections will be used to build your home page. They can also be added to sub pages on your website.

Footer

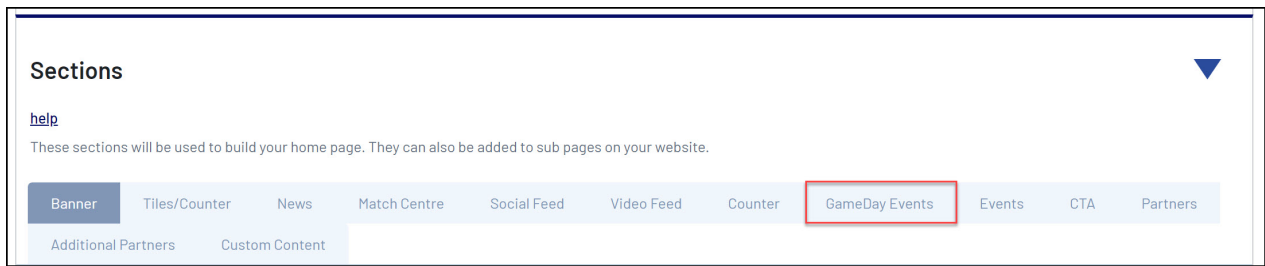

help

The footer appears on the bottom of the page across your website. I contains four columns which you can add content to.

Publish

Update

6. Click the **GAMEDAY EVENTS** tab

## 7. Paste the API Key and Widget ID in the relevant fields

The screenshot shows the 'GameDay Events' configuration panel. It includes an 'Overview' section, a 'Show Panel' toggle, a 'Panel Order' dropdown set to '2', a 'Background Colour' selector, and a 'Background Image' selector. Below these, there are two input fields: 'Event Heading' (set to 'GameDay Events') and 'API key' (set to 'CwTiUdx82vPZhAu0FSailq7VvqI0zQZlgLWVWmzMk6344cccd7'). The 'Widget ID' field is set to '6344cccd89f9f000e66654e'. At the bottom, there are radio buttons for 'column' and 'carousel' view types, with 'carousel' selected.

## 8. Scroll back to the top of the page and click **UPDATE**

The screenshot shows the 'Website Setup' page with a list of features: Your Website Features, Header, Sections, and Footer. Each feature has a 'help' link and a brief description. On the right side, there is a 'Publish' button and an 'Update' button (highlighted with a red box).

Any events from your GameDay database will then feed onto your website:
