

## Background Colour vs Background Image

Last Modified on 20/09/2023 4:44 pm AEST

For each section you have the ability to set either a background colour or background image.

<p><b>Background Colour</b></p> <p>Set a custom colour for this section</p> <div><div></div> Select Color</div>	<p><b>Background Image</b></p> <p>Set a background image for this section, will override background colour.</p> <p>No image selected <a href="#">Add Image</a></p>
---	--

Below provides an example of what both look like when assigned on a website

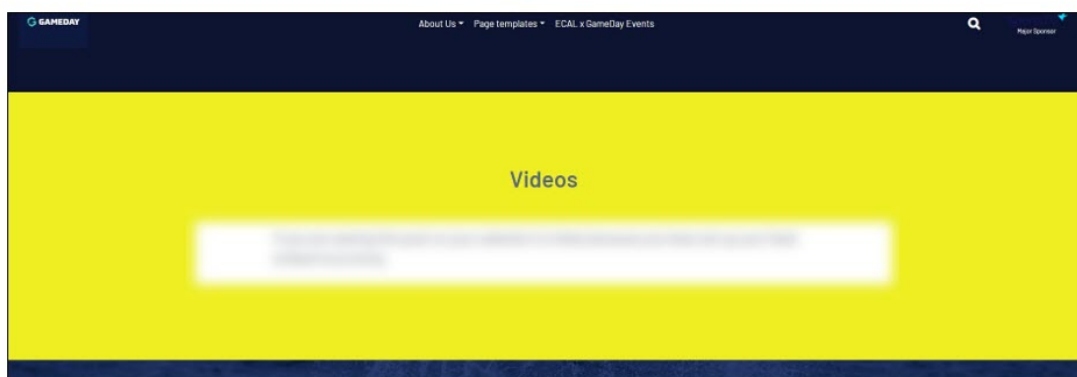

### **BACKGROUND COLOUR**

Multiple colours cannot be selected for one page panel, only one solid colour.

**Background Colour**

Set a custom colour for this section

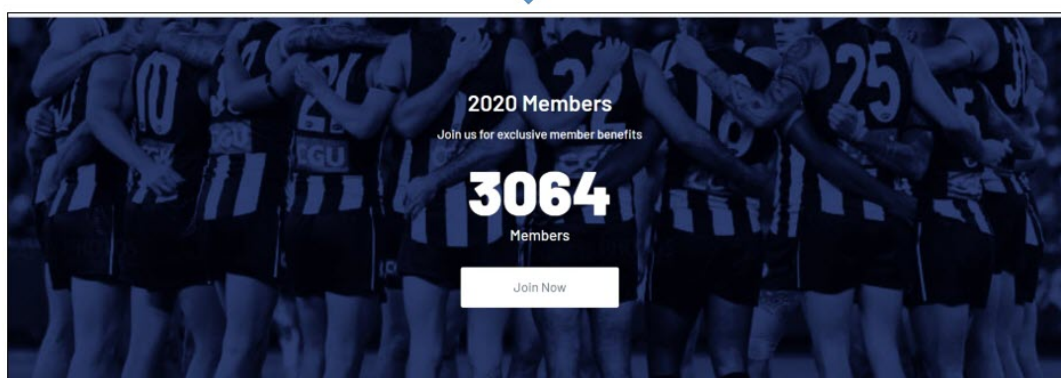

Select Color

### **BACKGROUND IMAGE**

When adding a background image, this should be a solid image.

Maximum upload file size: 50 MB. 1600 x 800 pixels is recommended. Make sure the image is cropped to suit the parts of the image you wish to have displayed.
