

Membership Management | Overview

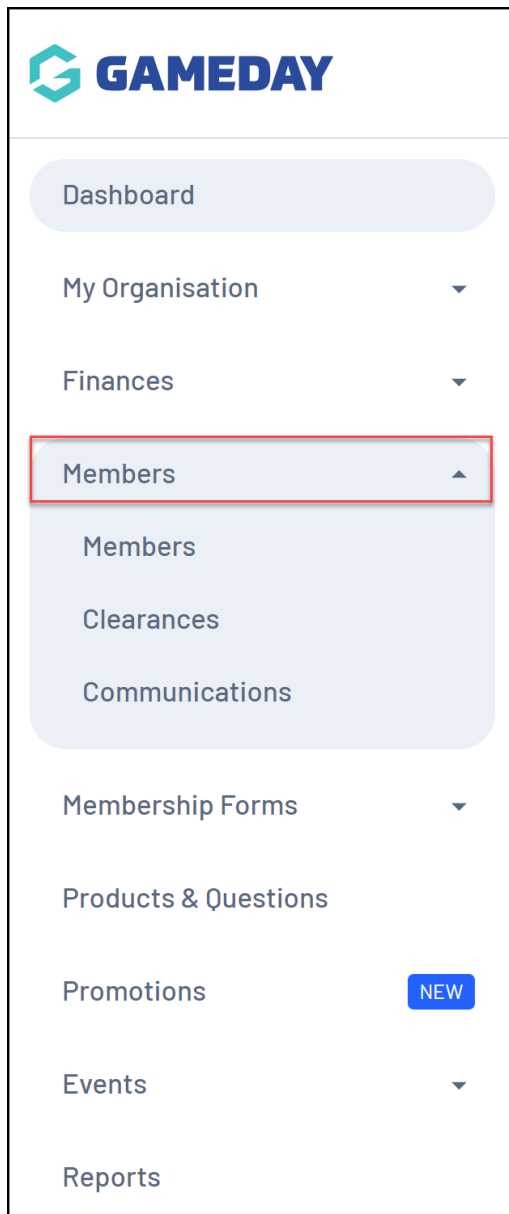

Last Modified on 01/11/2023 3:47 pm AEDT

GameDay's **Members** module serves as a complete directory for your membership base and allows you to search, view, edit and manage all of your members in one place, whether they are currently registered with your organisation or not.

Having a firm grasp on your membership database opens up a huge range of opportunities to engage and communicate with your members, report on their information and characteristics, and keep track of how your members are interacting with your membership forms through GameDay.

The help resources outlined below will give you an introduction to various aspects of your membership database including navigating your member list, understanding individual member records, outlining the clearance/transfer facility and configuring your communication settings.

To expand the Members section, click the **MEMBERS** option in the left-hand menu.

The **Members** menu includes the below features:

Members

Allows you to manage and communicate with all of your members in one area of the database. The Members section is characterised by two primary interfaces:

Member List - [Learn More](#)

Member Records - [Learn More](#)

Clearances

Allows you to manage the member transfer process within your hierarchy.

[Learn more](#)

Communications

Allows you to pre-configure email templates and see communication history.
